

Dual-Use Innovation for a Secure Food Future

Irina Arhipova

Rector of Latvia University of Life
Sciences and Technologies (LBTU)

ICA Forum 2026

EIT Food Partnership

Co-funded by the
European Union

2024-2025 LBTU as a EIT Food Hub for Latvia

- regional contact point,
- emphasizing its impact on regional innovation and agricultural development.

Since 2026 LBTU as a EIT Food Delivery Partner

- collaboration with EIT Food on the delivery of projects and programmes,
- taking the lead across a range of projects,
- opportunity to engage locally or regionally as a leader on an impact area or theme.

Meals Ready-to-Eat (MRE)

- **Meals Ready-to-Eat** are high-quality, long-shelf-life combat rations.
- MRE developed in collaboration with the LBTU and local producers.
- Built for extreme conditions:
 - ✓ nutritionally balanced, **ready to eat**, and
 - ✓ with a **shelf life of up to three years**.
- Used by the Latvian Armed Forces, they set a high standard for reliability and quality.

Advanced freeze-dried meals

- **Freeze-dried meals:**
 - ✓ lightweight, nutritious, and ready in minutes,
 - ✓ perfect for travel, or emergency use.
- Using rapid freezing and vacuum drying,
 - ✓ 90% of moisture is removed
 - ✓ while preserving taste and nutrients.
- Sealed in oxygen-free packaging, these meals **stay fresh for up to eight years.**
