Master Geslopan (Management of Local Development in Parks and Natural Areas)

INFO: www.unite.it; Emilio Chiodo: echiodo@unite.it

One year post-degree course (60 ECTS)

interdisciplinary education in the field of management, conservation and economical development of the Protected Areas.

Interdisciplinarity and Networking:

University (4 Faculties involved)
+ Natural Parks + Local administrations +
Entrepreneurs

Objectives: self-employment capacities (new business activities inside the protected areas; sustainable development consultants and project managers); new management and project capacities in parks managers

Formal and Informal learning

Five didactical units: each unit is developed inside a different Natural Park in Italy => direct knowledge of the different territorial natural-socio-economical patterns and local experiences (entrepreneurs, Parks managers, local development experts) by study visits, interviews, workshops and public debates.

Focus on: management and valorization of the natural resources; enterprise creation; marketing; conservation biology; sustainability of agro-food and tourism; projecting and fundraising.
