# ICA-Edu Colloquium 2017

Delivering graduates to meet the challenges of the sustainable development  
goals (SDGs):

embedding the development of ethical and sustainable values in the curriculum

13 & 14 June, 2017, Faculty of Agriculture, University of Zagreb, Croatia

## Importance of ICA-Edu actions (colloquiums, projects) in the following context:

Prof. Dr. Teodor Trasca  
BUAS Timisoara - Romania

### Present:

- In the quality evaluation of study programs there are no defined criteria regarding ethics and sustainability
- People / teachers are used to do / to change something, when someone asks for it
- People / teachers are not easily willing to get out of comfort, to change teaching act based on a new concept such as sustainable development goals

### Future:

- Without embedding now development of ethical and sustainable values in the curriculum, the reality will overwhelm us

? *Focus on graduates skills in terms of SDGs*

? *Redefining teaching not just as a delivering act from teacher to students – emphasizing ethical values regards to be the example*

## ICA-Edu actions:
