

CASE

Competencies for a Sustainable
Socio-Economic Development

ICA-Edu Colloquium May 2021

Michael Ambros

Centre for Global Change and Sustainability (BOKU)

About CASE

- 10 partners
- 5 European countries
- 2015-2017
- Erasmus+

With the support of the
Erasmus+ Programme
of the European Union

The European Commission support for the production of this publication does not constitute an endorsement of the contents which reflects the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

About CASE

- CASE aims at innovative ways of teaching and learning in order to achieve sustainable entrepreneurial education
- CASE supports university teachers and business partners to acquire competencies for sustainability-driven entrepreneurship
- CASE created the CASE Sustainability Performance and Competencies Tool
- CASE developed the curriculum of a new Joint Master Program on “Sustainability-Driven Entrepreneurship”

With the support of the
Erasmus+ Programme
of the European Union

The European Commission support for the production of this publication does not constitute an endorsement of the contents which reflects the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Guiding Questions

- What are competencies for sustainable socio-economic development?
- How to develop these competencies?

Common Understanding

- Focus on sustainability-driven entrepreneurship
- Inclusion of entre- and intrapreneurship

With the support of the
Erasmus+ Programme
of the European Union

The European Commission support for the production of this publication does not constitute an endorsement of the contents which reflects the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Master Curriculum

CASE-Master program on Sustainability-driven Entrepreneurship					
Target: Fostering competencies for sustainability-driven Entrepreneurship to support a sustainable socio-economic transformation in society					
Target Group: All students interested in Sustainability-driven Entrepreneurship/Intrapreneurship					
Bridging courses					ECTS
Semester 1	1.1 Transformation and Sustainability	1.2 Sustainable Economy	1.3 Interactions in multi-scales	5.1 Personal Development and coaching 1	30
	Transformation and Sustainability	Sustainable Economy	Interactions in multi-scales		
	First Week Challenge - Defining 'Sustainability-driven Entrepreneurship'	Excursions to Pioneers	Regional Sustainability Challenge - 1/2		
		Methodology and Tools 1	Methodology and Tools		
Semester 2	3.1 Pioneers of Sustainability: Intra- and Entrepreneurship	3.2 Sustainable Organisation and Management	2.1 Processes and Managment of Innovation	5.2 Personal Development and coaching 2	30
	Pioneers of Sustainability: Intra- and Entrepreneurship	Sustainable Organisation and Management	Processes and Managment of Innovation		
			Methods on innovation management		
	Impact	Finance	2.2 Regional Sustainability Challenge 2/2		
Semester 3	4.1 New institutional settings and Mulistakeholder networks	6.1 Elective Courses for specilization	6.2 Regional Hot Spots and thematic challenges	5.3 Personal Development and coaching 3	30
	New institutional settings and Mulistakeholder networks	Elective Courses for specilization OR Internship	Regional Hot Spots and thematic challenges		
Semester 4	4.2 Mulistakeholder conference	6.3 Internship	5.4 Master Thesis		30
	Mulistakeholder conference	Internship OR Elective Courses for specialization	Master Thesis

Practical Cooperation Guide

Knowledge Platform / Practical Cooperation Guide

Nine innovative cooperation formats based on twenty-one university courses tested and evaluated within CASE address topics and methods important to **foster competencies for sustainability-driven entrepreneurship**. The practical cooperation guide features these nine cooperation formats and highlights concrete benefits, success factors and challenges for users. Important steps are explained for necessary preparation and implementation phases. **Tested pilot examples** and further supporting material can be accessed and downloaded for free.

Service Learning

Knowledge Platform / Practical Cooperation Guide / Service Learning

What is it about?

Service Learning or learning by engagement represents one of the most promising methods promoting Education for Sustainable Development. It is an alternative teaching approach where students are confronted with real-world problems and try to find solutions cooperating with partners such as communities, NGOs and companies.

Students learn and develop through engaging in concrete projects by meeting the needs of communities and making personal experiences, embedded in an academic learning environment where they can reflect upon their actions.

These projects are the ones that create value, not only within your studies, but also beyond. You can try out, test your skills, get introduced to working life and develop your own projects.

Master Student

Social Design, University of Applied Arts Vienna

Phase 1 – Planning

Involvement of communities, NGOs or companies demands a well-organized preparation process. Individual consultations to introduce the purpose and design of service learning to project partners are vital. **Getting to know concrete project examples**, tasks and possible impact of service learning projects helps to better understand, plan and implement projects in practice.

Most important is the **creation of an inclusive space**, based on trust and continuous feedback processes between all involved stakeholders: Be open about different organizational infrastructures, resources and time frames between practice partners and lecturers. Try to communicate transparently and link different involvement of capacities into the learning process.

Phase 2 – Preparation

Benefits

- Creating impact with engagement
- Joyful and creative working atmospheres
- Promoting innovative potential via visionary thinking
- Personal development by taking over responsibility
- Critical reflection with community

With the support of the

Supportive Material and Tools

Knowledge Platform / Supportive Material and Tools

We have developed the Sustainability Performance and Sustainability Competencies Tool and other material **to support implementation of straightforward university-business cooperation**. They all promote continuous self-reflection about project experiences and foster dialogue and feedback processes. The material and tools structure your cooperation in a professional way, help students, teachers and cooperating partners to process experiences better and assist personal development of all parties.

Complexity:

Sustainability Performance Tool

A qualitative tool for recording and developing sustainability in companies and non-profit organizations.

Sustainability Competencies Tool

Knowledge Platform / Supportive Material and Tools / Sustainability Competencies Tool

What is it about?

The Sustainability Competencies Tool is a tool to make individual competencies for sustainable development visible and to give support to further development.

It assumes a holistic understanding of competence that includes values, knowledge and the ability to implement. The aim of the tool is to initiate reflection and dialogue processes on one's own competencies and to motivate to develop the potentials further.

It can be used as support for self-evaluation as well as for feedback processes in peer-groups, with coaches or teachers. Above all, the tool is used by students in the context of sustainability-oriented teaching events, but can also be transferred to sustainability-oriented companies and non-profit organizations in a modified form.

[Access the tool](#)

Step 1 – Get familiar with the competencies for sustainable development

The five fields of **sustainability competencies** serve as a guiding frame and are divided into five sub-competencies. Students should reflect upon each sub-competence and figure out, what it means in the context of the course.

For each sub-competence impulse questions are available which help to reflect upon the own competence development.

Step 2 – Evaluate competencies in a holistic way

Step 3 – Interpret the numeric values and start a dialogue about competencies

Step 4 – Compare and reconcile self- and external perception

Step 5 – Make competencies visible

Features

- Self-evaluation
- External evaluation
- Pre-post comparison
- Graphical visualization

Where to use it?

- **Service Learning**
- **Sustainability Screening**
- **Entrepreneurial Projects**
- **Internship**

Teaching Units

In this category you will find teaching units, which can be fully transferred into university lectures. The teaching units require around 60 minutes up to two semesters (such as courses, course blocks, curricula modules and concepts for summer schools). They include e.g., games, computer simulations, field trips, world cafés as well as e-modules, videos, or presentations.
